BRADDOCK, WALTER
NEW APPROXIMATION METHOD FOR THE DIFFRACTION BY A PLANE SCREEN. [1960] 10p.
12 refs.

Order from TLA ml\$1.50, ps\$1.50 61-10419

Trans. of Zeitschrift für Physik (West Germany) 1950,
v. 127, p. 361-390.

In addition to the Kirchhoff approximation, a series of new approximation methods for the problem of the diffraction of a scalar wave by a plane screen with an opening in the form of a plane disk are discussed. None of them give a solution for small wave length (large ka), but nevertheless solutions which are known in special cases since their series converge poorly for large ka . To fill this gap, a new approximation method is developed which is especially suited to large ka and which makes use of asymptotic boundary values of the function which have been taken from the exact solution in the limit of large ka . (Physics Wave Propagation 11, v. 5, no. 7) (over)
